Kuber Raj Kunal

AI Engineer | Generative AI | Agentic AI | Multi-Agent Systems | Google Cloud

India krk2000raj@gmail.com +91 6371 649 030 kuber-raj-kunal KuberRaj

Profile

AI Engineer & Cloud Developer specializing in production-grade multi-agent systems, graph-based AI workflows, and GCP data automation solutions. Proficient in Python, FastAPI, FastMCP, React, BigQuery, and Cloud Run, with hands-on experience in custom tool integration, human-in-the-loop guardrails, RAG, agents, and full-stack AI application delivery.

Skills

Generative and Agentic AI: Google ADK 2.x (Graph-Based Workflows), Gemini Models, Multi-Agent Orchestration, Pydantic, Native ADK Evaluation Frameworks, Prompt Engineering & Optimization, Grounded RAG

Cloud Services & DevOps: GCP (Cloud Run, BigQuery, Compute Engine, Cloud Storage, Agent Platform, Cloud Code), Docker Containerization, GitHub Actions (CI/CD)

Backend/API Development: Python, FastAPI, FastMCP, Flask, Request Handling, RESTful APIs, OpenAPI/Swagger Comprehension

Data Engineering & Databases: SQL (BigQuery), MySQL, Pandas, NumPy, dbt (Data Build Tool), Apache Airflow, JSON-Based Vector Storage

Frontend Development: JavaScript, React, HTML5, CSS3, Tailwind CSS, REST API Integration

Version Control & Collaboration: Git, GitHub, Asynchronous Workflows (Jira, MS Teams, Slack), Agile / Scrum Collaboration

Additional Exposures: Vector DB, Terraform, AWS Infrastructure

Experience

Capgemini, Associate Consultant — Jan 2026 – Present

Agentic AI Development (Google Cloud)
Agentic AI Engineer | Ongoing

- Architected an enterprise multi-agent platform using **Google ADK 2.x graph workflows** and **GCP**, boosting pipeline reliability by **40%**.
- Built full-stack orchestration using **FastAPI** and **React** with human-in-the-loop guardrails, accelerating features by **25%**.
- Developed multi-agent workflows using **FastMCP** and **Pydantic schemas**, cutting manual data prep effort by **60%**.
- Benchmarked agent tool-calling accuracy and latency metrics using Google ADK's native **evaluation framework**.
- Containerized application suite via **Docker** for **GCP Cloud Run** deployment, accelerating client onboarding.

Capgemini, Senior Analyst — Oct 2024 – Dec 2025

GenAI & Mainframe Migration Initiatives
GCP Data Engineer | Accelerator SME | Completed

- Engineered a high-availability GenAI accelerator to automate migration of thousands of legacy **Teradata SQL** files to **BigQuery**.
- Applied iterative **prompt tuning** to maximize SQL translation accuracy, reducing manual conversion hours by **65%**.
- Built full-stack features using **Python** and **React**, optimizing async operations to slash model inference latency.

Automated Agentic RAG Framework, Personal Project — Portfolio Assistant

AI Engineer | Deployed

- Architected a zero-infrastructure RAG assistant using **GitHub Actions** to automatically re-generate semantic embedding JSON files on document commits. Deployed a grounded **Gemini-powered agent** featuring SSE streaming, a Python backend on **Render**, and a **React/Tailwind** frontend on **Vercel**.

Education

Bachelor of Technology, CSE — Sri City, AP
Indian Institute of Information Technology — 2024

- **Coursework:** Artificial Intelligence, Machine Learning, Cryptography, Data Structures and Algorithms, Computer Vision

Certificates

Associate Cloud Engineer(ACE) , *Google Cloud* — Mar 2026
Generative AI Leader , *Google Cloud* — Apr 2026
