

Kuber Raj Kunal

📍 Airoli, Mumbai ✉ krk2000raj@gmail.com ☎ +91 6371 649 030

Profile

Lead AI Engineer & Associate Consultant with a track record of rapid advancement in architecting **Agentic AI platforms**. Expert in **GCP (Vertex AI, BigQuery)** and multi-agent orchestration using **FastMCP and FastAPI**. Proven success leading engineering teams to automate enterprise data workflows, consistently delivering **40%+** improvements in pipeline reliability and operational efficiency.

Skills

Programming Languages: Python, Java, SQL, JavaScript
Frontend Development: React, HTML5, CSS3, Tailwind CSS, REST API Integration
Backend/API Development: Flask, FastAPI, FastMCP, Request Handling, RESTful API
Data Processing and Engineering: Pandas, NumPy, Feature Engineering, dbt (Data Build Tool), BigQuery, AirFlow
Databases and Storage: PostgreSQL, MySQL, Cloud Storage (GCS, AWS S3)
AI/ML/Gen AI: LLM, Prompt Engineering, Prompt Optimization, Google ADK(Agent Development Kit), Streamlit, Vector Databases
Cloud Platforms: **GCP** (Vertex AI, BigQuery, Compute Engine, Cloud Run, Cloud Code), **AWS** (EC2, Lambda, S3, RDS)
DevOps and Infrastructure: Terraform (Trained - foundational implementation knowledge), Basic Cloud IAM Concepts
Version Control and Collaboration: Git, GCP Source Repositories, Agile / Scrum Collaboration

Experience

Capgemini, Associate Consultant Mumbai, MH
Oct 2024 – Present

Agentic AI Development (Google Cloud)

Lead AI Engineer | Ongoing

- Leading a team of **5 engineers** to architect an agentic platform using **Google Agent Development Kit** and **BigQuery**, improving data ingestion speed and pipeline reliability by **40%**.
- Directing full-stack orchestration using **FastAPI** and **React**, optimizing system architecture to reduce UI-backend latency by **25%** and accelerate feature delivery cycles by **30%**.
- Developed multi-agent workflows using **FastMCP** and **Vertex AI**, including a Data Quality Agent that increased validation accuracy by **45%** and cut manual preparation effort by **60%**.

GenAI & Mainframe Migration Initiatives

GCP Data Engineer | Accelerator SME | Feature Developer | Completed

- Engineered a **high-availability GenAI tool** on-prem, optimizing **LLM workflows** for mainframe-to-cloud conversion to improve accuracy by **35%** and up-time by **30%**.
- Developed full-stack product features using **Python and React**, reducing **model inference latency by 25%** through integrated backend and UI performance tuning.

On-Prem to Cloud Database Migration (PoC)

Data Engineer | Completed

- Engineered an automated **AWS migration pipeline** (S3, Lambda, Airflow) to transition on-prem PostgreSQL data, achieving complete **data integrity** and a **60% reduction** in manual effort.

Education

Bachelor of Technology, CSE Sri City, AP
2024
Indian Institute of Information Technology

- Coursework:** Artificial Intelligence, Machine Learning, Cryptography, Data Structures and Algorithms, Computer Vision

Certificates

IBM GenAI Engineering, Coursera Oct 2025

- LLM application development, including fine-tuning, RAG architecture, and deployment of GenAI models
